FOOT LOOSE

Flooring and carpet options
bring style to the surface

BY JULIE SANDERS

PURELY PORCELAIN

Parker Wood Porcelain tiles from Porcelanosa look like wood but offer the benefits of tile in terms of function, maintenance and durability. The tiles come in different sizes, textures and finishes—including an anti-slip finish that makes them suitable for bathroom or even outdoor installations. porcelanosa-usa.com

1/ THE WAYS OF WOOL

Part of a collection designed by Kelly Wearstler for The Rug Company, the Array Light rug is made of soft, hand-knotted Tibetan wool. Inspired by the look of mismatched stones, it's available in natural shades that subtly showcase the design, as well as in a darker-hued version. therugcompany.com

2/ SET IN STONE

The Maxima collection by Imola Ceramica imitates natural stone surfaces. Pictured here,

the look of Rainbow Teak sandstone—which has a precise veining pattern in gray, yellow and pink—is duplicated, but with impervious porcelain tile instead of porous sandstone, which is more difficult to maintain. Available at Italo Ceramica. italoceramica.com

3/ SUSTAINABLE SURFACE

EcoDomo's hardy, eco-friendly Cork Design Collection offers myriad choices, with a range of styles, sizes and hand-assembled surface designs. Available in floating planks, glue-down tiles and sheets and panels lami-

nated to MDF (engineered fiberboard) slabs. Pictured here, floating cork planks in a dark Rum finish. ecodomo.com

4/ MODERN HISTORY

The new Timothy Corrigan custom rug collection for Patterson, Flynn & Martin showcases a warm palette of creams, lavenders, reds and blues in patterns grounded in historical reference but modernized by the designer's own sensibility. Pictured here, Rue Lafayette in a sandstone colorway. pattersonflynnmartin.com
